The **Cruzer G4** compound bow is a versatile and adaptable option that suits both youth and adult archers. Weighing only 3.2 pounds, this lightweight yet powerful bow offers exceptional maneuverability without compromising on performance. Its compact design, featuring a 6.25-inch brace height and 29-inch axle-to-axle length, strikes the perfect balance between stability and agility. The draw weight range of 10 to 70 pounds and draw length range of 14 to 30 inches allow for customization to suit various archers, while the 75% let-off ensures a smooth shooting experience. Additionally, it comes with a comprehensive Trophy Ridge Ready-To-Hunt package, including a V-Biscuit rest, premium 4-pin sight, 5-arrow quiver, stabilizer, Radial peep sight, and wrist sling. Whether you're honing your skills on the range or heading out into the field, the **Cruzer G4** compound bow is designed to deliver exceptional performance and versatility for archers of all ages and skill levels. The **Bear Cruzer Compound Bow** comes with several premium features such as V-Biscuit rest, peep sight, and stabilizer which make it a solid choice for hunters. While its performance may not be outstanding, it's sufficient for most hunting situations. If you're looking for a reliable bow that won't break the bank, the **Bear Cruzer** could be worth considering. It has a limited lifetime warranty from Bear, known for producing high-quality bows for decades. For those who enjoy spending time in nature and want to take on the challenge of bow hunting, the **Bear Cruzer** may be a good option. Its sturdy design makes it perfect for hunters who need a reliable bow that can withstand the rigors of hunting without compromising quality. Key features of the **Bear Cruzer** include: * IBO Speed Rating: 310 fps * Bow Weight: 4 lbs * Brace Height: 7.25 inches * Axle-To-Axle: 32.25 inches * Draw Length Range: 24-31 inches * Let-Off: 80% * Draw Weight Range: 50-70 pounds The bow's riser is made of aluminum, providing a sturdy and lightweight design. Its grip is slim and pleasant to hold, making it easy to address the bow consistently for accurate shots. The single-cam **Cruzer S7** cam system is smooth and easy to draw, with a large valley allowing the shooter to relax at full draw. Overall, the **Bear Cruzer Compound Bow** is a reliable choice for hunters who need a high-quality bow that won't break the bank. The **Cruzer** compound bow from Bear is an excellent choice for those seeking a smooth shooting experience without prioritizing high speeds. Its adjustable draw weight and length allow for a comfortable fit, making it ideal for beginners or those who want a general idea of their preferred poundage. The **Bear Cruzer G2** is an exceptional beginner compound bow designed for young archers and those who need versatility in their gear. This bow has undergone significant upgrades, including the addition of a hinge cable guard and new limb pockets, making it a smart choice for those seeking Bear's cutting-edge design. In comparison to other bows, such as the **Diamond Infinite Edge Pro** and **PSE Brute Force**, the **Cruzer G2** offers an ideal balance between performance and adaptability. Its draw weight can range from 5 pounds to 70 pounds, catering to various shooters' needs. Additionally, the bow's draw length can be adjusted from 12 inches to 30 inches, providing a suitable option for young archers who may outgrow their equipment quickly. The **Cruzer G2** has proven its value as one of Bear Archery's top-selling bows, demonstrating its effectiveness in producing high-quality compound bows. The **Bear Cruzer G2** offers adjustable settings that can "grow" with young shooters as their arms strengthen and lengthen. This compound bow is suitable for most hunters, with a max poundage of 70 and a dual-cam system providing plenty of speed. The package includes six Trophy Ridge accessories, making it an excellent value. While not ideal for elite target shooters or advanced hunters seeking maximum performance, the **Cruzer G2** is perfect for those looking for a reasonably priced compound bow that's packed with versatility and adjustment. I put the **Cruzer G2** through its paces by shooting at ranges from 10 to 35 yards on my backyard 3-D course. The advertised IBO speed of 315 fps was not achieved due to my draw length and weight setting, but my 400-grain arrows were still fast and penetrating out to 35 yards. The two-cam system delivered a smooth draw cycle at 55 pounds, with only minor drawbacks such as a slightly "mushy" back wall. The shot had a slight tingle, but no discomfort, despite the 55-pound weight setting. A bit more noise was detected compared to other budget bows, likely due to the dual-cam design and lack of vibration-damping material between the split limbs. Overall, the **Cruzer G2** performed well for its price point, making it an excellent option for bowhunting enthusiasts seeking a versatile and adjustable compound bow. could be tamed a bit with some after-market accessories.Fit and FinishThe **Bear Cruzer G2** doesn't boast any fancy features, but it does come with quality accessories like limb pockets and fittings that seem rugged and solid. The Trophy Ridge four-pin sight may not impress those who need precise tuning, but it's durable enough to last for years. Plus, the bow comes with a light to illuminate pins in low-light settings or while hunting from a blind.Balance and HandlingThe **Bear Cruzer G2** feels a bit lightweight at just over three pounds, which can be an issue when aiming. However, its relatively heavier weight makes it easier to hold and aim for some users.What This Bow Does BestFor \$420, the **Bear Cruzer G2** offers incredible value for beginners looking to start serious bowhunting. The bow's quality gear and accessories make it a great option for building brand loyalty and growing the sport of archery. What this Bow Does WorstThe **Bear Cruzer G2** isn't designed for speed or flashy looks; it's a no-frills, budget-friendly option meant for ease of shooting and morphing into a serious hunting tool.Does the **Bear Cruzer G2** Deliver on Its Mission?The bear claims this bow is engineered for all ages and skill levels, and we couldn't agree more. With its adjustability and quality features, the **Bear Cruzer G2** delivers on its mission to provide an accessible and enjoyable archery experience for beginners and seasoned shooters alike.
