science fiction and popular culture. In recent years, however, the idea of asteroid colonization has become more realistic and feasible, thanks to advances in technology and space exploration. There are many potential benefits to colonizing asteroids, and these benefits make the pursuit of asteroid colonization a worthwhile endeavor. One of the most
obvious benefits of asteroid colonization is the scientific potential. Asteroids provide a unique environment for scientific research due to their small size, low gravity, and lack of atmosphere. Research conducted in these environments could provide valuable insights related to many different academic fields. Not only that, but asteroids could also serve
as stepping stones for future missions to other destinations in the solar system, such as Mars or the moons of Jupiter and Saturn. Another benefit of asteroid colonization is the potential for economic growth and development. Natural resources mined on asteroid colonization is the potential for economic growth and development.
revenue for both governments and private companies. Asteroid mining could also reduce the need for resource extraction on Earth, which could help to preserve our planet's natural environment. In addition to economic benefits, asteroid colonization could also have important implications for the long-term survival of humanity. Asteroids could serve
as potential refuge for humans in the event of a large-scale disaster on Earth, such as an asteroid impact or a nuclear war. Even if such a disaster doesn't occur, asteroids could provide valuable information regarding the origins and evolution of the solar system, and how life emerged here in the first place. Next, listen to the lecture below: Sample
Answer:Both the article and audio are about the aspect of establishing a human settlement on the moon. On the other side, the lecturer challenges the writer of the article and gives suggestions for each of the reasons. Firstly, the author indicates that the moon.
does not have any living substances or air. The author also expresses that people could be harmed by solar radiation and meteorite impacts which are most dangerous. Besides, he says that it would take an extremely long time to develop technology if think about solving this issue. After that, he gives an idea to use low-tech solutions to protect
humans who want to live on the moon. For example, lunar soil can be used to protect settlers from radiation and protect them from meteorite impacts. Secondly, as per the article, there are no resources available on the moon that can be used for their survival, for example, soil and air. On the other side, shifting settlers on the moon can be so
expensive that nations on the earth would not want to waste money. However, the lecturer in the audio notes that there is situated in the polar regions of the moon and can be used to make breathable air, fuel, and even food without using soil.Lastly, the article
reflects that there would be psychological issues related to establishing a lunar colony. This is the reason for being continuously unreachable on the moon and not having proper access to artistic experiences and landscapes. On the other side, the lecturer in the audio states that this issue can be solved by regular communication systems on the earth
and using virtual technology. He also mentions that habitats could be formed with open spaces and light which is natural on the earth can help to reach the moon. Hopefully, you have clearly understood the TOEFL Writing Task
2: Academic Discussion (Corporate Impact)Read the sample question carefully to answer. Corporate Impact Professor: Next week, we're going to spend a lot of time in class discussing the positive and negative ways in which companies affect the world around us. Before we start talking about that in class, I want to hear what you think about the
topic. So here's a question for the message board: In your opinion, what is the best way for a company to have a positive impact on society? Sarah: I believe that companies should focus on making their operations more socially and environmentally friendly. While charitable giving can be beneficial, it doesn't address the root causes of serious social
and environmental problems. By doing business in more responsible ways, companies to do the same. That's the only way we can really solve today's problems. John: While those are very good
points, I think that companies should focus on charitable giving. Philanthropy can provide immediate relief to those in need and contribute to the overall well-being of society right away. It could take years or decades for business changes to have a positive impact on society, and most people just can't wait that long. Sample Answer: This is a
challenging topic but still donating to charity is one of the best ways for companies to make the world better. According to me, John's idea of charitable donations is a way to quickly talk about the serious issues that many of us are facing. In addition, some major issues like homelessness and food insecurity are faced by many companies. But, a small
contribution or donation can save someone's life. As mentioned Sarah raised the relevant point that philanthropy might help companies attract new customers but she did not say anything that the purchasing decisions of people are based on cost. Many of us buy cheap products even if they are sold unofficially. The reason is that the economy is in
such rough rough shape. However, they just can not afford the reputation of a business when they are shopping. the lecture and the reading. Well organized with few language errors. 4 Generally good in selecting the important information from the lecture and reading. May have minor omission, inaccuracy, vagueness, or imprecision of some content. More frequent or noticeable minor language errors. 3 It conveys only vague, global, unclear, or somewhat
imprecise information about the lecture and reading. Key points may be missing. Errors of usage and/or grammar may be more frequent and obscure meanings. 2 Contains some relevant information from the lecture, but is marked by significant language difficulties or by significant omission or inaccuracy of important ideas. 1 Provides little or no
meaningful or relevant coherent content from the lecture. The language level of the response is so low that it is difficult to derive meaning. 0 Merely copies sentences from the topic, is written in a foreign language, or is blank. TOEFL Independent Writing Task For the Independent Writing task, you'll
have receive a question on a particular topic or issue. You'll have 30 minutes to plan and write a response to that topic that explains your opinion on it. Displays strong and consistent language skills with minimal errors. 4 Addresses the topic and task well, though some points may not be fully elaborated. Is generally well
organized and well developed. Occasional noticeable minor errors in structure, word form, or use of idiomatic language that do not interfere with meaning. 3 Addresses the topic and task using somewhat developed explanations, exemplifications, and/or details. May demonstrate inconsistent facility in sentence formation and word choice that may
result in lack of clarity and occasionally obscure meaning. 2 Limited development in response to the task. An accumulation of errors in sentence structure and/or usage. 1 Little or no detail, or irrelevant specifics, or questionable responsiveness to the task. Serious
score of 5. It includes a written passage, the transcript of a conversation (which would be an audio recording on the actual TOEFL, and the essay prompt. After the prompt is an example of a top-scoring essay. You can read the essay prompt.
Prompt You have three minutes to read the following passage and take notes. In many organizations, perhaps the best way to approach certain new projects is to assemble a group of people into a team. Having a team of people attack a project offers several advantages. First of all, a group of people into a team of people into a team.
than any single individual is likely to possess. Also, because of the numbers of people involved and the greater resources they possess, a group can work more quickly in response to the task assigned to it and can come up with highly creative solutions to problems and issues. Sometimes these creative solutions come about because a group is more
likely to make risky decisions that an individual might not undertake. This is because the group spreads responsibility for a decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable if the decision to all the members and thus no single individual can be held accountable in the members and the members are the members are the members are the members and the members are the me
voice in making a decision will no doubt feel better about carrying out the work that is entailed by that decision than they might doing work that is imposed on them by others. Also, the individual team member has a much better chance to "shine," to get his or her contributions and ideas not only recognized but recognized as highly significant,
because a team's overall results can be more far-reaching and have greater impact than what might have otherwise been possible for the person to accomplish or contribute working alone. Now listen to part of a lecture on the topic you just read about. (Professor) Now I want to tell you about what one company found when it decided that it would
turn over some of its new projects to teams of people, and make the team responsible for planning the projects and getting the work done. After about six months, the company took a look at how well the team performed. On virtually every team, some members got almost a "free ride" ... they didn't contribute much at all, but if their team did a good
job, they nevertheless benefited from the recognition the team got. And what about group members who worked especially well and who provided a lot of insight on problems and issues? Well...the recognition for a job well done went to the group as a whole, no names were named. So it won't surprise you to learn that when the real contributors were
asked how they felt about the group process, their attitude was just the opposite of what the reading predicts. Another finding was that some projects just didn't move very quickly. Why? Because it took so long to reach consensus...it took many, many meetings to build the agreement among group members about how they would move the project
along. On the other hand, there were other instances where one or two people managed to become very influencers said "That will never work" about an idea the group did. Sometimes when those influencers said "That will never work" about an idea the group was developing, the idea was quickly dropped instead of being further discussed. And then there was another occasion
when a couple influencers convinced the group that a plan of theirs was "highly creative." And even though some members tried to warn the rest of the group that the project was moving in directions that might not work, they were basically ignored by other group members. Can you guess the ending to *this* story? When the project failed, the blame
was placed on all the members of the group. Directions You have 20 minutes to plan and write your response will be judged on the basis of the quality of your writing and on how well your response will be 150 to 225 words.
Summarize the points made in the lecture you just heard, explaining how they cast doubt on points made in the reading. TOEFL Integrated Writing Sample Essay The lecturer talks about research conducted by a firm that used the group system to handle their work. He says that the theory stated in the passage was very different and somewhat
inaccurate when compared to what happened for real. First, some members got free rides. This also indicates that people who worked hard was not given recognition they should have got. In other words, they weren't given the opportunity to "shine". This derectly
contradicts what the passage indicates. Second, groups were slow in progress. The passage says that groups are nore responsive than individuals because of the number of people involved and their aggregated resources. However, the speaker talks about how the firm found out that groups were slower than individuals in dicision making. Groups
needed more time for meetings, which are necessary proceedures in decision making. This was another part where experience contradicted theory. Third, influetial people might emerge, and lead the group towards glory or failure. If the influent people are going in the right direction there would be no problem. But in cases where they go in the
wrong direction, there is nobody that has enough influence to counter the decision made. In other words, the group might turn into a dictatorship, with the influential party as the leader, and might be less flexible in thinking. They might become one-sided, and thus fail to succeed. TOEFL Writing Sample Analysis There are three key things this TOEFL
example essay does that results in its high score: Clearly presents main points Few grammatical/spelling errors This essay clearly organizes the points made in the lecture you just heard.") There is one
paragraph for each point, and the point is clearly stated within the first sentence of the paragraph followed by specific details from the lecture. This organization makes it easy to follow the writer's thinking and see that they understood the lecture. This organization makes it easy to follow the writer's thinking and see that they understood the lecture.
Each main paragraph includes an example of how the two are differences answers the second part of the prompt ("explain how they cast doubt on points made in the reading") and shows that the writer
understood both the lecture and reading well enough to differentiate between the two. Finally, there are only a few minor spelling and grammar errors, the most noticeable of which is the incorrect use of the word "influent" in the final paragraph (it should be "influential"), and they do not detract from the meaning of the essay. This writer shows a
strong grasp of the English language, a key TOEFL skill. This essay shows that the writer understood the main points of both the lecture and the reading well enough to both describe them and contrast them. That, along with the relatively few mechanical errors, gives the essay a top score. Top-Scoring Independent TOEFL Writing Sample Below is an

words. Do you agree or disagree with the following statement? Always telling the truth is the most important consideration in any relationship. Use specific reasons and examples to support your answer. Independent TOEFL Writing Sample Essay the traditional virtue of telling the truth in all situations is increasingly doubted by many in today's
world. many believe that telling the truth is not always the best policy when dealing with people. moreover, the line of a "truth" is becoming more and more vague. this essay will explore the importance of telling the truth in relationships between people. we all understand that often the truth is offending and may not be a very nice thing to both hear
or say. lies or white lies often have their advantages. the manipulation of white lies is the most obvious the business world. how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that some product is "the finest" or "the cheapest"? how many times have we heard that some product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have we heard that product is "the finest" or "the cheapest"? how many times have the cheapest is the many times have the cheapest is the finest is the cheapest is
that if a company is to tell the absolute truth about it's products, no one would be interested in even having a look at the products. the same logic applies to human relationships. if your friend had worn a newly purchased dress on her birthday and energetically asked you if it was a worthy buy, would you freely express your opinion that you had never
seen a dress as the one she's currently wearing? and spoil her birthday? unarguably, hiding(entirely or particially) the truth in some situations can be quite handy indeed. confrontations and disputes can seemingly be avoided. however, there is always the risk factor of the truth emerging sooner or later when telling an untruth. the basic trust in any
relationships(businessman/customer, friends, parents/children) will be blotched, and would have an impact on the future relationship between both parties. the story of the "the boy who cried wolf" fully illustrates the consequenes of telling untruths. no one will believe you when you're telling the truth. your word will have no weighting. in addition
another "bad factor" of telling untruths is that you have absolutely no control over when the truth is uncovered after a period of time; fear and the burden of sharing a "secret". in the long run, it seems that hiding the truth is not beneficial to either party.
everyone hates betrayal. even if it is the trend to occasionally hide the truth in relationships, it is strongly recommended that not to follow that trend as the risk and the consequences of the truth in relationships are founded on "trust"
which goes hand in hand with "truth". indeed telling the truth is the most important consideration in any relationship between people. always. TOEFL Writing Sample Analysis There are three key things this essay does that results in its high score, and each is explained in more detail below. Is well organized Uses specific examples Few
grammatical/spelling errors The essay, like the first one, is well organized. The writer's position is clear within the first few sentences, and the rest of the essay elaborates on that position. Each paragraph begins with a new major point that is then explained. This logical flow of ideas is easy for readers to follow and shows that the writer knows how to
set up a clear argument. Another reason the essay received a top score is because the writer used specific examples to make her point. By using specific examples, such as a friend buying a new outfit and asking your opinion and phrases businesses use to sell products, the writer makes her argument stronger and more concrete. Finally, despite the
lack of capitalization throughout the essay, there are few spelling and grammatical errors, and the ones that do exist don't detract from the meaning of the essays that are clear and get their point across. Where to Find More TOEFL

TOEFL no longer uses its original name, and the acronym no longer stands for anything. Now, TOEFL stands for just TOEFL is a standardized test that measures a test-taker's mastery of the English speakers. A Brief History
of the TOEFL and Its Name Below is a short history of the TOEFL and the different names it has been known by. From its creation in 1963, the exam's official name was the Test of English as a Foreign Language, which was commonly abbreviated to TOEFL. The exam was created as a way to measure the English skills of non-native speakers hoping to
attend schools where English was the language of instruction. Looking at a student's TOEFL, used from 1964 to 1979, was completely multiple choice and tested students on their reading, listening and grammar
skills. In 1979, the TOEFL was revised and new, optional TOEFL tests focusing on writing and speaking skills were added. These two new tests were called TWE and TSE (Test of Written English, respectively). In 1998, the first computer-based version of the TOEFL (the TOEFL CBT) was released. In 2005, the TOEFL again
underwent revisions and was released as the TOEFL iBT, which is the version of the exam still being used today. The TOEFL iBT combines the reading, listening, speaking, and writing sections into a single exam that is taken on the computer. The TOEFL iBT has an increased emphasis on integrative skills and using multiple skills at a time to answer a
question. Around this time, the creators of the TOEFL dropped its longer, original name, and its acronym became the official name. Today, the TOEFL meaning and history, check out ETS's guide to the TOEFL program history. What
Are Other Common TOEFL Abbreviations? Now you know what TOEFL abbreviations you should be aware of. ETS: The Educational Testing Service (ETS) is the organization that designs, administers, and scores the TOEFL. They
also oversee other standardized exams such as the GRE and TOIEC. TOEFL CBT: This acronym stands for computer-based TOEFL. The TOEFL iBT and is now no longer used. TOEFL iBT: What does iBT stand for in TOEFL? iBT is an
abbreviation for "internet-based test." The internet-based test." The internet-based test." The paper-based TOEFL, or TOEFL iBT, is by far the most popular version of the TOEFL iBT, is by far the most popular version of the TOEFL iBT, was taken by
people in areas where the TOEFL iBT wasn't available. It has now been replaced by the revised TOEFL ITP: What does TOEFL ITP mean? Its full name is the TOEFL Institutional Testing Program Assessment Series, and it is a
series of paper-based tests teachers can use to measure their students' English skills. TOEFL ITP scores won't be accepted by universities as a replacement for the TOEFL, but they can be used as English-placement tests in schools or for scholarship programs, among other uses. IELTS: The International English Language Testing System (IELTS) is
the other main exam that tests for English language proficiency, in addition to the UK, Australia, or Canada than it is by those applying to universities. TOIEC: What does TOIEC stand for? The TOIEC (which formerly stood for Test of English for
International Communication) is another standardized test produced by ETS to measure English skills. However, unlike the TOEFL, which is used mostly by people hoping to attend university or graduate school, the TOEFL, which is used mostly by people hoping to attend university or graduate school, the TOEFL, which is used mostly by people hoping to attend university or graduate school, the TOEFL is primarily used by employers to test the language skills of potential employees. TEFL: This acronym is very close to TOEFL, but
it stands for something entirely different! TEFL stands for "Teaching English as a Foreign Language" and it refers to English language instruction for non-native English speakers. It's also possible to be TEFL-certified, which means you've taken a class and possibly an examination that show you have the skills needed to teach English. Recap: What
Does TOEFL Stand For? TOEFL used to stand for "TOEFL was created in 1963 as a way to measure the English skills of non-native
speakers hoping to attend a school where classes were taught in English. Over the years, the TOEFL has changed to test more skills, and the exam has gone from being paper-based to primarily computer based to primarily computer and the exam has gone from being paper based to primarily computer based. There are lots of acronyms associated with the TOEFL, and knowing the key ones can help you stay organized and
understand the exam and what it tests better. What's Next? Now that you know the story behind the TOEFL so you can get the process started! Not sure what TOEFL score you should be aiming for? Learn what a good TOEFL score is based on the
schools you're interested in. How difficult is the TOEFL and reasons why it may not be as challenging as you think! One of the hardest sections to prep for on the TOEFL can be the TOEFL writing section. After all, it's hard to find a native English speaker who
will correct and grade your essays in the writing section—and even harder to find one who knows the test! Never fear. In this post, we'll look at sample high-scoring essays for the first and second tasks and then break down what's good about them (and how they might improve!) In this post, I'll also provide links to several additional TOEFL Writing
samples for the Independent Writing task. And there will be two TOEFL Writing samples for the Integrated Writing Task. These sample answers will come with full Writing task. And there will be two TOEFL Writing of part of a

A Few Quick Tips on Using These TOEFL Writing Task 2 Samples Remember that TOEFL Writing Task 2 requires you to give a personal opinion on a broad social
issue. The TOEFL Writing topics covered in task 2 will likely be ones you're already familiar with: issues related to things like high school, life in a small town vs. a big city, how governments should support education, dealing with co-workers, etc.... Be prepared for contemporary topics about today's world as well: social media, cell phones,
technological advances, and the like. Above all, be prepared to share your personal experiences, while still following the rules of formal academic in tone and structure. Give a main reason for your opinion, but also use reasons- well thought-out ones- to support that opinion. Use the

For our prompts, we'll be looking at some of Kate's excellent suggestions in this post on TOEFL writing. Let's give it a go with the first independent essay topic! Prompt Do you agree or disagree
with the following statement? Modern life is easier than life in the past. Use specific details and examples to support your answer. Sample Essay I definitely agree that modern life is easier than life in the past. The increased use of technology, rising standards of living, and improved healthcare have combined to make our lifestyles, at least in the first
world, luxurious compared to lifestyles of the past. By examining three specific examples—personal computers, The Lion in Winter, and vaccines—this essay will demonstrate that this improvement has, indeed, taken place. In the first place, technological advances have created new ways to take care of mundane tasks quickly and easily. For example,
the majority of Americans now have their own personal computers. This is an amazing advance: with computers, we can complete tasks, from banking to ordering groceries, that would have taken hours even a few decades ago. Word processing is common, making the spread of information much easier to achieve, and education is available to all for
architecture, travel, and even textiles. Looking at a film like The Lion in Winter, while by no means historically perfect, does show how even everyday things were more difficult almost a thousand years ago. Set in the 1100s, the film shows King Henry II having to break ice from his water bowl to get water to wash his face—something that hot and cold
running taps have long since saved us from. The queen has to travel to see her husband by a long boat journey, which would be almost unthinkable today. Finally, the entire royal family, even though they are royal, is wrapped in encumbering furs. Looking at what was once the highest standard of living, compared to the average first world standard of
living today, we can see how much easier progress has made our lives. Finally, we no longer live in fear of many common diseases that once crippled or maimed large populations, making their lives much harder. For example, polio used to strike many people, in some cases making it difficult for them to walk, such as Franklin D. Roosevelt, who used a
wheelchair. The invention of that vaccine in the 1950s, as well as numerous other vaccines, has created a situation in which we no longer have to suffer unnecessarily. This is most certainly an improvement over the past. In conclusion, life today is definitely easier than life in the past. Though it is easy to read stories of nobles and kings of history and
romanticize them, their lives were almost certainly more uncomfortable than our lives are. Nevertheless, there are many places in the world where laptops, modern conveniences, and vaccines are rarely found; I hope that current generations will work together to make life easier for everyone, now that it is possible to do so. Essay Evaluation OK, let's
dissect this sample essay. Specifically, we'll be taking a look at what the author did well and points upon which the author could have improved. Now, let's go through a few important points. First of all, remember that the TOEFL essay is scored holistically, meaning that you don't get a certain number of points off your score (or added on) for the
absence or presence of different items. Rather, the scorers grade it against a rubric, seeing which points from the rubric best describe your essay. First of all, a thesis statement: we want this to be immediate and direct. By immediate, I mean that it should show up within the first few sentences of your essay. Here, the author does this: right away, she
writes "I definitely agree that modern life is easier than life in the past." Remember, we don't have a huge amount of time to write this essay! It might be a
prettier essay if this author eased into the subject by providing an example or a quote to start with, but this works pretty brief—given more time, it would be nice to have a quick recap of the points she's made here, but
they do exist. This makes the structure easier to understand and helps the scorers to see right away that you understood the task and have addressed it, fully and completely. Next, the examples. These are of primary importance! The examples here are relatively simple, but we don't need to reinvent the wheel (so to speak). Notice that this author
picks examples from different areas: society, a movie, and history. The FDR example could maybe be fleshed out a little more and elaborated on to make this more specific and slightly stronger, but generally, these examples do make the author's point. What about the language? It's pretty strong here. The author varies her sentence structure; take a
look at the conclusion for an example of this. She uses transition words ("in conclusion"), although these are sometimes simple. Finally, she also shows off her vocabulary ("encumbering," "romanticize"), demonstrating that she has an advanced grasp of English. Is this a perfect essay? Not by a long shot. But is it a high-scoring TOEFL essay? You bet.

TOEFL Integrated Writing Task, With Full Sample Prompt and Commentary CLICK TO EXPAND Read the following passage and continue. American literature of the early 20th century saw the rise of a number of influential authors writing in a new style. Ernest Hemingway, F. Scott Fitzgerald, E.E. Cummings, and Ezra Pound, among many others, left
an undeniably deep impact on how we write, even today. The author and poet Gertrude Stein is sometimes included in such lists, but her work is notably less influential than that of her contemporaries. For a number of reasons, critics have often pinned her work as an eccentricity worthy of little more than a historical footnote. For one, Stein's works
tend to be inaccessible to the reader, primarily because she did not clearly communicate thoughts and emotions in much of her writing. Literary critic Edmund Wilson asserted that Stein's shortcoming was that she took many of the concepts that underlay Cubism, a style of painting that emphasized visual representation without clear emotion or
meaning, and attempted to apply them to language. This resulted in work that relied heavily on the sounds of the words used, rather than on the meanings they held. Moreover, Stein's work rarely included conventional punctuation. Her sentences blend together into long, unbroken chains, without commas or periods to signal where one idea ends and
another begins. In avoiding punctuation so often, Stein made her prose and poetry unnecessarily difficult to decipher. Few authors have avoided punctuation in the same way because it simply distracts from the writer's message and adds little value if any. Certainly, it is easy to be deceived as to Stein's literary influence by the historical importance of
Stein's salon—regular gatherings in her home frequented by a figure is far more valuable than are their social connections. Although Stein was close with several major authors and artists of the time, that fact alone does not give her real historical
significance. Now, listen to the lecture on Stein disagrees wholeheartedly with the views presented in the lecture you just heard, explaining how they oppose specific points made in the reading. TOEFL Independent Writing Task 1 Sample Essay The professor giving the lecture on Stein disagrees wholeheartedly with the views presented in
the text that her class had read. There are a few key points that she calls specifically into question: how well Stein communicated, the refusal to use punctuation, and the importance of Stein's social connections. In the first of those three points, the professor presents an argument that contrasts starkly with the text. Whereas the reading says that
Stein's use of cubist aesthetics created inaccessible work—prose that did not communicate to the reader—the professor brings up the possibility of Stein's impact on later poets. She argues that since Stein's day, poetry has shifted to rely more heavily on the sounds of words used, rather than their meaning, and that Stein was likely a significant
influence on that change. Furthermore, according to the professor, Stein's decision to omit punctuation from her work was not merely a way to make her writing more difficult to follow. Instead, Stein elaborates in her own essay on the topic on why she viewed punctuation as unnecessary. The professor is of the opinion that Stein's view is both valid
and unique, one that we should contemplate carefully. And finally, in her lecture, the professor points out that Stein's influence on the writers and artists she kept as friends is not to be understated as merely a social connection. Although the text claims that Stein's "salon" was only of historical significance, rather than literary importance, the
speaker says that Stein directly affected the writing style of Hemingway. That provides clear evidence of Stein's importance in the development of literature at the time. Explanation of the Sample Samples for TOEFL Integrated Writing As you've seen
