Even people who are not "numbers people" may have a soft spot for one number in particular: 7. For various reasons, many of us find it fascinating, even magical. Consider: Bestselling books feature it in their titles, (e.g., Seven Characteristics of Emotionally Strong
People), and the mere sight of three sevens standing by a slot machine with a plastic bucket of quarters. What is it about the number that causes such a visceral response? Why didn't any slot-machine manufacturers make their jackpot sequence three ones in a row or
even three fives? After all, one and five are perfectly good numbers. The fact is that, historically, the number 7 has played a significant role in society, culture, religion, and even psychology. Here are 7 reasons we are so drawn to the number: 1. It has been significant role in society, culture, religion, and even psychology. Here are 7 reasons we are so drawn to the number: 1. the seven wonders of the world which comprised a bucket list for every world traveler — the Great Pyramid of Giza, the Hanging Gardens of Babylon, the Temple of Artemis at Ephesus, the Statue of Zeus at Olympia, the Mausoleum at Halicarnassus, the Colossus of Rhodes, and the Lighthouse of Alexandria. 2. It has had significance in almost every major
religion. In the Old Testament the world was created in six days and God rested on the seven-day-week we use to this day. In the New Testament the number seven is also featured in the Book of Revelation (seven churches, seven
angels, seven seals, seven trumpets, and seven trumpets, and seven the Koran speaks of seven heavens and Muslim pilgrims walk around the Kaaba in Mecca (Islam's most sacred site) seven times. In Hinduism there are seven higher worlds and seven underworlds, and in Buddhism the newborn Buddha rises and takes seven steps. 3. It is associated with luck and
magical properties. Seven not only represents the jackpot on slot machines, but it s also the basis for many myths and folklore. For example, various parts of the world had beliefs about the seventh son, legends that endowed him with magical powers of both the good and evil variety (e.g., the child was believed to have healing powers
according to Irish folklore). 4. It matches our memory capacity. In 1956, George Miller of Harvard University wrote what is today considered one of the classic papers in psychology in which he demonstrated that most people can retain roughly seven items of information in their short-term memory. That is why phone numbers in the U.S. and many other
countries tend to have seven digits (area code not withstanding) — as it is the most digits most people are likely to recall (although cell phones have done away with the need to recall anyone's phone number, even our own). 5. It fits our attentions spans.
as long as the information is presented in seven groups. While bloggers and authors tend to take more advantage of this fact, some seem to take more advantage the others. For example, the book: 7 Pages to Success: The Ultimate Short-Attention-Span Guide to Unlock Your Full Potential! is only 7 pages long, which is fine, but it costs $7 (!), which leads me to
believe the only real potential being unlocked is that of the author's bank account. 6. It is a prime number are those that can only be divided by themselves and by the mumber 1, and have long been considered special to mathematicians alike. Seven is considered by some to be the most 'prime' number within the
first 10 numbers as you cannot multiply it within the group, making it a kind of optimal-prime (not to be confused with Optimus Prime, who is a Transformer). 7. It is the most popular number and over 4,000 of them named the number 7, far more than any other number.
Indeed, ask people to name a number from one to ten and many will name the number seven — as many magicians know. It is this combination of cultural, historical, religious, numerical, and psychological factors that contribute to the allure of the number 7 and the sway it has over our decisions. For example, my book, Emotional First Aid: Healing
Rejection, Guilt, Rejection, and Other Everyday Hurts, was initially supposed to have eight chapters (one for each psychological 'wound') but after consulting with my editor, I decided to reduce the number of chapters (and wounds) to seven (loss, rumination, loneliness, and low self-esteem, in addition to the three in the subtitle) as I believed focusing on
seven psychological wounds would be easier for readers to absorb and to recall rather than eight. Was I correct? Check out the book and let me know. culture and is often seen as highly symbolic. This section needs additional citations for verification. Please help improve this article by adding citations to reliable sources in this section. one stroke as a curve that looks like an uppercase (J) vertically inverted (1). The western Arab peoples developed the digit from a form that looked something like 6 to one that
looked like an uppercase V. Both modern Arab forms influenced the European form, a two-stroke form consisting of a horizontal upper stroke joined at its right to a stroke going down to the bottom left corner, a line that is slightly curved in some font variants. As is the case with the European digit, the Cham and Khmer digit for 7 also evolved to look like
their digit 1, though in a different way, so they were also concerned with making their 7 more different. For the Khmer this often involved adding a horizontal line to the top of the digit.[2] This is analogous to the horizontal stroke through the middle that is sometimes used in handwriting in the Western world but which is almost never used in computer
fonts. This horizontal stroke is, however, important to distinguish the glyph for one in writing that uses a long upstroke in the glyph for seven from the glyph for seven from the glyph for one in writing that uses a long upstroke in the glyph for 1. In some Greek dialects of the early 12th century the longer line diagonal was drawn in a rather semicircular transverse line. On seven-segment displays, 7 is the digit with the most common
graphic variation (1, 6 and 9 also have variant glyphs). Most devices use three line segments, but devices made by some Japanese companies such as Sharp and Casio, as well as in the Koreas and Taiwan, 7 is written with a "hook" on the left, as ① in the following illustration. Further
segments can give further variation. For example, Schindler elevators in the United States and Canada installed or modern typefaces
in typefaces with text figures the character usually has a descender, as, for example, in . Most people in Continental Europe,[3] Indonesia,[citation needed] and some in Britain, Ireland, Israel, Canada, and Latin America, write 7 with a line through the middle (7), sometimes with the top line crooked. The line through the middle is useful to clearly
differentiate that digit from the digit one, as they can appear similar when written in certain styles of handwriting. This form is used in official handwriting rules for primary school in Russia, Ukraine, Bulgaria, Poland, other Slavic countries,[4] France,[5] Italy, Belgium, the Netherlands, Finland,[6] Romania, Germany, Greece,[7] and Hungary.[citation

(happy prime),[13] a safe prime (the only Mersenne safe prime), a Leyland number of the second kind[14] and Leyland prime of the second kind[15] ( 25-52 {\displaystyle 2^{5}-5^{2}}), and the fourth Heegner number.[16] Seven is the lowest natural number that cannot be represented as the sum of the squares of three integers. A seven-sided
shape is a heptagon.[17] The regular n-gons for n \le 6 can be constructed by compass and straightedge alone, which makes the heptagon that cannot be directly constructed with these simple tools.[18] 7 is the only number D for which the equation 2n - D = x2 has more than two solutions for n and x natural. In particular, the
equation 2n - 7 = x^2 is known as the Ramanujan-Nagell equation. 7 is one of seven numbers in the positive definite quadratic integer matrix representative of all odd numbers: {1, 3, 5, 7, 11, 15, 33}.[19][20] There are 7 frieze groups in two dimensions, consisting of symmetries of the plane whose group of translations is isomorphic to the group of
integers.[21] These are related to the 17 wallpaper groups whose transformations and isometries repeat two-dimensional patterns in the plane.[22][23] A heptagon in Euclidean space is unable to generate uniform tilings alongside other polygons, like the regular pentagon. However, it is one of fourteen polygons that can fill a plane-vertex tiling, in its case
only alongside a regular triangle and a 42-sided polygon (3.7.42).[24][25] Otherwise, for any regular n-sided polygon, the maximum number of intersecting diagonals (other than through its center) is at most 7.[26] In two dimensions, there are precisely seven 7-uniform Krotenheerdt tilings, with no other such k-uniform tilings for k > 7, and it is also the
only k for which the count of Krotenheerdt tilings agrees with k.[27][28] The Fano plane, the smallest possible finite projective plane, has 7 points and 3 lines cross every point.[29] This is related to other appearances of the number seven in relation to exceptional objects, like the fact that the
octonions contain seven distinct square roots of -1, seven-dimensional vectors have a cross product, and the number of equiangular lines possible in seven-dimensional space is anomalously large.[30][31][32]Graph of the probability distribution of the sum of two six-sided dice The lowest known dimension for an exotic sphere is the seventh dimension.[33]
[34] In hyperbolic space, 7 is the highest dimension for non-simplex hypercompact Vinberg polytopes of rank n + 4 mirrors, where there is one unique figures with rank n + 3 mirrors exist in dimensions 4, 5, 6 and 8; not in 7,[35] There are seven fundamental types of catastrophes. [36] When rolling two
standard six-sided dice, seven has a 1 in 6 probability of being rolled, the greatest of any number.[37] The opposite sides of a standard six-sided die always add to 7. The Millennium Prize Problems remain unsolved.[39]

The Pythagoreans invested particular numbers with unique spiritual properties. The number seven was considered to be particularly interesting because it consisted
of the union of the physical (number 4) with the spiritual (number 3).[46] In Pythagorean numerology the number 7 means spirituality. The number seven had mystical and religious significance in Mesopotamian culture by the 22nd century BCE at the latest. This was likely because in the Sumerian sexagesimal number system, dividing by seven was the
first division which resulted in infinitely repeating fractions. [47] Mathematics portal Wikiquote has quotations related to 7 (number). Wikimedia Commons has media related to 7 (number). the day for lovers, much like Valentine's Day in the West. Chinese Love Story One story goes (there are several versions of the story) that the Jade Emperor had a beautiful daughter. The Jade Emperor is the highest of gods. His daughter owned a magic robe which allowed her to travel to Earth. Once while bathing in a stream, a cowherd stole her magic
robe. Without the magic robe, she could not return to her father. The cowherd took the princess back to his home. They fell in love and got married. The Jade Emperor was furious. One day the princess found the magic robe her husband had hidden. She put on the robe and went to visit her father. The Jade Emperor immediately asked all the rivers to flower
across the sky (the Milky Way), making it impossible for the princess to return to her husband. After a while the Jade Emperor did soften and decided to permit the young lovers, celebrated in many countries in Asia. From a concert during

Revelation 17: 9 The Seven-branched Candelabrum The Menorah
has been a symbol for Judaism for about 3000 years. Exodus 25:31-40 explains to the last detail how the Menorah is to be made. "And you shall make a lamp stand out of one side of it and three branches of the lamp stand out of the other side of it;....
It was used in the ancient Holy Temple in Jerusalem. The Seven-branched Menorah is a reminder of the words written in Isaiah 42:6, "....to be a light to all nations,..." It is also said that the Menorah is a symbol of the burning bush seen by Moses. Many say it also is a symbol of the seven days of creation. It is now the emblem of Israel. The sukkot is known
as the "Festival of the Booths". This holiday is a reminder of the days wondering through the desert after the escape from the slavery in Egypt. "You shall live in booths when I brought them out of the land of Egypt: I am the Lord your God." Leviticus 23:42-
43 Sukkot is a harvest festival and also a joyous festival. For this holiday, the Jews will build a Sukkah, a kind of temporary hut. Jews will eat their meals in the Sukkah when possible. Jews may follow a custom of inviting seven symbolic biblical Ushpizin (guests) to their Sukkah. The seven symbolic Ushpizin are: Abraham, Isaac, Jacob, Joseph, Moses,
Aaron, and David. Some Jews also extend the invitation to seven female biblical figures: Sarah, Rebecca, Leah, Rachel, Miriam, Abigail, and Ester. It is also customary to invite guests to dine in the Sukkah and visit th
procession that will make seven circuits around the Bimah (platform where the Torah is read). The seventh day of Sukkot is the festival of the Simchat Torah. Simchat Torah is the day when the last part of Deuteronomy is read,
followed by the first chapter of Genesis. This signifies the cycle of the Torah. It has neither beginning nor end. The Torah out on the streets making it
an extremely joyous festival. This is a genuine happy celebration. The children enjoy plenty of candy. Many will enjoy lots of good wine. The Simchat Torah is absolutely party time! Many Jews refer to a wedding as a simchah, which means a joyous event. A Jewish wedding may take place anywhere. It is required that the couple stands under a chuppah, a
wedding canopy. It is a symbol of their new home. The groom is led to the chuppah by two men, often his father and father-in-law. Likewise the bride is led seven times around the groom. This may symbolize the seven days of creation and that the couple will also
create new life. The bride and groom drink from the wine and the groom places the ring on the bride's finger as he says: "You are hereby sanctified to me with this ring according to the Laws of Moses and Israel." In the second part of the ceremony the Seven Blessings are recited. The ceremony concludes with the breaking of the glass, as a reminder of
the destruction of the temple. Finally the entire congregation shouts "Maz'l tov", meaning "Congratulations" or "May you enjoy a good fortune". Seven Weeks Shavuot is celebrated to commemorate Moses receiving the Torah, with the list of the Ten Commandments, on Mount Sinai. This happened seven weeks after they had departed from Egypt. Many
may choose to stay awake all night studying the Torah starting Shavuot Eve. During Shavuot Eve. During Shavuot Eve. During Shavuot Eve. During Shavuot is also a Harvest festival. At the time of the Temple, Jews would bring offerings of the first harvest
to the Temple in Jerusalem. Farmers would bring the Seven Species written about in Deuteronomy 8:8; wheat, barley, grapes, figs, pomegranates, olives and dates. These are the Seven Species the land of Israel is blessed with. The Israelites would also offer two loaves of bread from the wheat harvest. During Shavuot the Book of Ruth is read at the
morning service. The synagogue may traditionally be decorated with plenty of flowers. Shavuot is a joyous festival. Shivah are the seven closest relatives of the deceased: father, mother, son, daughter, brother, sister and spouse. Before
or at the funeral ceremony the mourners perform "Keriah", They rend (tear) a garment as a symbol of separation. It should be a garment worn over the heart, for example a shirt or blouse. This has roots in Genesis 37:34; when Jacob was misled to believe his son Josef had been killed by wild animals he rent his garments. Many Jews may wear a torn, black
ribbon pin. The torn garment or the torn black ribbon is worn throughout the Shivah. The mourners sit Shivah in the home of the mourners do not have to prepare
meals for themselves. The first meal is called "The meal of recovery". The mourners do not leave the house during Shivah, except for Sabbath, but it still counts as one of the mourner should sit on a low stool or on the floor.
All mirrors should be covered during Shivah. The mourner must not study the Torah, except for the Book of Lamentations

and the book of Job. The mourner must abstain from sex. The mourner should not do business except for emergencies. The Shivah house for a walk together with friends and family. After the Shivah, the next period of mourning begins. It is called the shloshim and

lasts for thirty days after the burial. There are seven verses in the first sura (chapter) in the Qur'an. During the rituals of Hajj, the pilgramage to Mecca, pilgrims walk around the Kaaba seven times. The Kaaba is the most sacred site of Islam. Muslims believe it was rebuilt by Abraham and his son Ishmael. Pilgrims also walk/run between Mount Safa and
Mount Marwah seven times. This is a reminder of Hagar (the mother of Ishmael) when she desperately ran between the two hills in search for water from a well came to sight, thus saving the lives of mother and child. The well was given the name Zam Zam. The water from
the Zam Zam well is sacred to the Muslims. Now a day's pilgrims may walk between the two hills in air-conditioned tunnels. Pilgrims are also required to throw seven pebbles at each of the Devil. The "Stoning of the Devil" is performed at Mina, just outside of Mecca. In the Qur'an chapter 18 we can read about the Seven
Sleepers as told by Muhammad. God had sent the angel Gabriel to reveal the story of the Seven Sleepers to Muhammad. The name of chapter 18 is "The Cave". The Dome of the Rock in Jerusalem. It is said that this is also the very same site that the Temple of Solomon and Herod's Temple once was. It is told
that Muhammad one night flew on the winged steed, named Buraq, from Mecca to Jerusalem. He was accompanied by the Archangel Gabriel. He landed on the Temple Mount. His journey continued from the Temple Rock through the Seven Heavens until he met Allah. He met earlier profits in each of the Heavens. Muhammad met with Allah and asked
about the number of times each believer is to pray every day. The number five was agreed on. Muhammad returned safely to Mecca the very same night. is a boy and one sheep if the baby is a girl. This is a feast day. It is encouraged that some of the meat (a third) is given to the needy. Not all Muslims celebrate Aqiqa. The Seven Laws of Noah are also called the Noahide Laws. According to the Talmud, these laws were given to Noah by God as binding laws for all mankind. As every person on earth is a
child of Noah, these laws apply to all of mankind, not only the Jews. This according to the Noahide movement. It is said that any non-Jew who follows these laws were given first to Adam in the Garden of Eden. The seventh law "eating flesh from a living animal" was added after the Flood of Noah.
There is a growing movement of non-Jews who have accepted these Laws of Noah and have chosen to live their lives according to them. The movement is called the B'nei Noach, Children of Noah. The rainbow is the modern symbol of the Noahide Movement. This is in remembrance of the rainbow that appeared after the Great Flood of the Bible. 1. You
shall have no other idols before God 2. You shall not blaspheme God's name 3. You shall not murder. 4. You shall not eat the flesh cut from a living animal. (This also implies: Do not eat or drink blood) Nowruz is the
Iranian New Year celebration. This festivity has been celebrated since ancient times and occurs in late March. Nowruz is celebrated in many counties. There are quite a few traditions associated with Nowruz. One of the customs is to set the table with the Seven S's. The Seven S's. The Seven S's (called the "Haft Sin" in Persian) are the seven items each staring with the
letter S in the Persian alphabet. Haft means seven and Sin is S. The picture is of the White House Haft Sin Table prepared by Laura Bush in 2008. The items of the Haft Sin table are: Sabzehwheat, barley or lentil sprouts growing in a dish symbol of rebirth Samanu a sweet puddingsymbol of affluence Senjed the dried fruit symbol of love Sir garlicsymbol

(meaning Seven Fruits) instead of Haft Sin. Haft Mewa is a fruit salad made from seven different dried fruits, served in the fruit syrup. The seven sisters were the daughters of the titan Atlas and the sea-nymph Pleione. The seven sisters were also
known as "The Pleiads". Their names were: MaiaElectraTaygateAlcyoneCalaenoSteropeMerope The hunter, Orion, was continually pursuing the sisters. "The Pleiads" painted by Elihu Veddar - 1885 Atlas had been forced to support the celestial globe for all eternity and was therefore unable to defend his daughters. Zeus, the leader god, took pity on the
seven sisters and transformed them into stars. Orion was later also transformed into a constellation of stars and ended up not so far from the seven sisters. It is said Orion continues his pursuit of the Pleiads. In Thailand the Pleiads are known as "Dao Look Gai", the chick stars. There was an old couple who lived in the forest by the hill. They were very
poor. There most precious possession was a hen and her seven chickens. One day a monk came by. They invited him to stay the night. As monks do not eat from midday to until daybreak, they offered him nothing but water that evening. They knew the monk needed to eat in the morning. The couple agreed they had to serve the monk the best meal they
could afford. That meant killing the mother hen. The mother hen heard the couple talking and gathered her chicks to inform them that she would soon be gone. She made them promise to look after each other and love each other. The next morning the man killed the mother hen. The seven chicks watched as he was roasting their mother over an open fire.
The seven chicks were so devastated that they all jumped into the fire to be with their mother. The seven chicks were then reborn as stars and can be seen as the cluster of seven stars in the sky. If a baby is born when the moon passes Dao Look Gai it is considered to be very auspicious. The child will have lots of good luck. Atlas and the Hesperides"
Painter John Singer Sargent (1856-1925) Museum of Fine Arts, Boston, MA In one version of Greek myth, Atlas was also the father of the Seven Hesperides (daughters of the Evening Star). They guarded the tree with the golden apples. Gaia had given the tree to Hera (the queen goddess) when she married Zeus (the chief god). The garden with the tree
of the golden apples was located close by the place where Atlas carried the celestial globe on his shoulders. In the version of the myth proclaiming Atlas as the father, the seven are given the names: ÆgleArethusaErytheaHestiaHesperaHerperusaHespereia In other versions there are only three Hesperides. See number 3. The number seven is the sacred
number of Apollo. He was one of the most important Greek gods. Apollo was the son of Zeus and Leto and the twin brother of Artemis (Diana in Roman myth). Apollo was known as the leader of the Nine Muses. He was also the god who could spread plague with his arrows, but could also cure illness. Apollo was associated with prophecy and the Oracle of
Delphi. It is told he was born on the seventh day of the seventh month. The Greek hero, Odysseus had many encounters and adventures on his long journey home from Troy. of Ogygia. The island of Ogygia was the home of the beautiful nymph named Calypso. She fell madly in love with Odysseus and promised to commit to her for life. Calypso kept Odysseus hostage on the island for seven years. Odysseus was feeling more and more desperate and only wanted to return home
to his wife, Penelope. The gods finally took pity on Odysseus and sent Hermes (the messenger god) to order Calypso to let Odysseus go. Oedipus, king of Thebes was found guilty of incest and murder. He was forced to step down from the throne. When his two sons, Eteocles and Polynices turned against him, Oedipus put a curse on them. The two brothers
agreed to take turns ruling Thebes every other year. After the first year Eteocles refused to step down from the throne. Polynices raised an army led by seven against Thebes: Amphiaraus - Eteoclus - Capaneus - Hippomedon - Parthenopeus - Tydeus - Polynices was one of the seven
commanders. After much fighting, it was decided that the two brothers should meet each other in a single combat. In that last fight Polynices and Eteocles killed each other. The curse of Oedipus was fulfilled - Egyptian Mythology Isis was the sister and wife of Osiris. Their evil brother murdered Osiris. Seth then gave Isis seven scorpions. These seven
scorpions promised to protect Isis and her unborn son. Isis came to a village and asked for shelter in a home belonging to a very wealthy woman. The woman did not recognize Isis and slammed the door in her face. Isis then found a poor peasant woman who welcomed her into her home and gave her shelter. The seven scorpions were furious at the
wealthy woman and decided to take revenge. One of the scorpions crept into the home of the rich woman and stung her son. The mother screamed for help as her boy was dying, but no one would help her. Isis took pity on the woman. The goddess said a magic spell and neutralized the poison. The child immediately recovered. The wealthy woman was
extremely grateful. She donated all her belongings to Isis and the poor peasant woman.
